

ABSTRACT AMENDMENT(S)

Please insert the following abstract as page 10 of the application:

In order to make an optical interconnection of either two optical fibers to each other or of one optical fiber with an optoelectronic conversion circuit, it is planned to have a module provided with a body or package ~~(2)~~ in which sections ~~(3)~~ of optical fibers are overmolded. The overmolding on the one hand simplifies industrial-scale manufacture and, on the other hand, enables the adoption, for the optical fiber sections, of shapes such as flared shapes ~~(16, 17)~~ and/or lenses ~~(18, 19)~~ enabling an appropriate refocusing or collimation of the light rays conveyed by these optical fibers.
